

## Problems & Solutions Course Outline

We'll have Unit themes such as Digital Imaging Print, Advertising & Design, Motion Graphics, Web Publishing, 3d, Film, Audio, Teach Peers, Interactivity, Collaborations, Festival Preparation, and Dvd Production. Let me keep it simple. You're here to create the best you. You need to plan to do the best work of your life. Each 3 weeks you will "Make a plan" within the theme and write a proposal & create a timeline of it's production. You are required to follow through with your plan or your grade will suffer tremendously. Be responsible. Don't procrastinate. There will be no extensions to deadlines. You're practicing and preparing for the professional world. You are responsible for upkeep of your portfolio at all times. It should be updated per project. No excuses, no delays, no problems.

### Structure of course

**Plan & Research – all sites cited in proposal always**

**Paragraph proposal**

**Submit timeline = Google Calendar of everyday**

**Produce project**

**Post on web**

**Critique**

**Revise & Finalize**

**Turn in**

**Present to class**

Network class = Ning.com – rate & comment (critique) on all others in class

Post online & Present to class all projects

Icon Sets

Preparation paragraphs-clarify and simplify structure

What is a critique? How do you do it?
